NOTE 3.014-1: Two Types of Alternator Brackets were used on the 62 01 and 62 10. They can be identified as follows:

Type 1: The Bracket is "L" shaped and Steel Bar Stock. The Adjusting Strap is 5-1/2" long with two 13/32" I. D. Mounting Holes.

Type 2: The Bracket is Cast Iron and the Adjusting Strap is 3-3/4" long with one 13/32" Mounting Hole.

NOTE 3.014-2: Two Types of Generator Support Brackets were used on the 63 01 (LAC) Model. They can be identified as follows:

Type 1: The Support Bracket is made of Bar Stock and is internally threaded at both ends.

Type 2: The Support Bracket is a stamping with "L" shaped ends.
